REVIEW
on the educational and scientific program
"INTERNATIONAL ECONOMIC RELATIONS"
for the training of higher education applicants at the third (educational and
scientific) level of specialty 292 "International Economic Relations"
developed by the Department of International Economic Relations and
Business of the National Aviation University

The peer-reviewed educational and scientific program is a system of documents developed based on normative documents of the Ministry of Education and Science of Ukraine. The general characteristics of the educational program are presented on the official website of the university.

The purpose of the educational-scientific program "International Economic Relations" at the third (educational-scientific) level of higher education is the training of highly qualified scientific-pedagogical personnel, which involves a deep rethinking of the existing and the creation of new complex knowledge and their introduction into professional practice, through the formation and development of students program competences, necessary for them to solve the actual problems of research and innovation, professional and teaching activities in the field of international economic relations, for aerospace and other branches of the economy and reflect them in their own scientific research, as well as the formation of values in higher education seekers (postgraduate students): professionalism, transparency, honesty and openness, social responsibility for the results of scientific and scientific-pedagogical activity before society, principles of interdisciplinary approach, development and transfer of scientific research.

The formation of students of higher education (postgraduate students) will enable them to solve complex problems of professional and/or research and innovation activities in the field of international economic relations and other branches of the world economy, in particular aerospace, which involves a deep rethinking of existing and the creation of new holistic knowledge and/or professional practice.

The program contains mandatory and optional parts. All disciplines of the compulsory part are provided in the curriculum. The disciplines of the curriculum of the peer-reviewed educational and scientific program "International Economic Relations" for training students of higher education of the third (educational and scientific) level form the entire necessary list of professional competencies provided by the standard for specialty 292 "International Economic Relations".

The quality of the content component of the curriculum is beyond doubt. The educational disciplines included in the plan reveal the essence of today's relevant processes and allow to fully form the programmatic results of training for future doctors of philosophy in international economic relations.

The peer-reviewed educational and scientific program has a high level of educational and methodological documentation and normative materials. A selective analysis of the electronic library catalogue of the National Aviation University shows that it contains material on all declared disciplines, practice and final control.

It should be noted that one of the strengths of the educational and professional program is its quite experienced professors and teaching staff, as well as leading practical workers, who are involved in its implementation. One of the advantages of the reviewed program when forming the disciplines of the professional cycle is taking into account the requirements of employers. The aerospace component in international economic relations makes the program unique in Ukraine and the EU.

In general, the peer-reviewed educational-scientific program "International Economic Relations" for the preparation of the third (educational-scientific) level of higher education, developed and implemented by the Department of International Economic Relations and Business of the National Aviation University, meets the basic requirements of the standard of higher education and contributes to the formation of professional competencies in the specialty 292 "International Economic Relations" field of knowledge 29 "International Relations".
