

## **REVIEW**

on the educational and professional program “International Economics”  
of the first (bachelor's) level of higher education  
in the specialty “Economics” of the field of knowledge “Social Sciences, Journalism,  
Information and International Relations”  
of the State University “Kyiv Aviation Institute”

The educational and professional program “International Economics” of the first (bachelor's) level of higher education is developed in accordance with the Standard of Higher Education of Ukraine, specialty “Economics”. The document is structured in accordance with the requirements of the Ministry of Education and Science of Ukraine and contains information on competencies, learning outcomes, program structure and assessment methods. The sequence of disciplines, the plan and schedule of the educational process, the list and scope of disciplines fully meet the objectives of the educational and professional program.

The program contains clearly defined general and specialized competencies that meet the current requirements of the labor market. The educational components cover key aspects of international economics, including global economic trends, international trade, and financial markets. The developers of the educational program provide for the widespread use of modern teaching and assessment methods, in particular, case methods and project-based learning are combined with the possibility of internships and internships at enterprises and organizations in Ukraine and around the world.

Given the challenges of the digital transformation of economic processes, it would be useful to strengthen the relevant educational components by introducing additional courses on modern economic trends, such as sustainable development, digital transformation, and artificial intelligence in the international economy. In addition, it would be useful to increase the number of courses in English, which would facilitate the international integration of graduates.

The educational and professional program “International Economics” of the first (bachelor's) level of higher education in the specialty “Economics” has significant potential for the formation of highly qualified specialists who will contribute to the development of the economy of Ukraine and the world. It provides students with comprehensive knowledge in the field of international economics, providing them with the necessary competencies for further employment.
