

## REVIEW

on the educational and professional program “International Economics”  
of the second (master's) level of higher education  
in the specialty “Economics” of the field of knowledge “Social Sciences, Journalism,  
Information and International Relations”  
of the State University “Kyiv Aviation Institute”

The Master's program in "International Economics" is a well-structured and comprehensive educational offering designed to meet the academic and professional standards. Developed in alignment with the Standard of Higher Education of Ukraine and the requirements of the Ministry of Education and Science, this program demonstrates a strong commitment to fostering excellence in the field of economics. It is tailored to equip students with the advanced knowledge and skills necessary to navigate the complexities of the global economy.

The program is meticulously organized, with a clear focus on both general and specialized competencies that align with the evolving demands of the labor market. It covers a wide range of critical topics in international strategies, international trade policies, global economy, financial markets, and cross-border economic cooperation. The program is thoughtfully designed to provide students with a deep understanding of theoretical frameworks while emphasizing practical applications through case studies, project-based learning, and opportunities for internships. These elements ensure that graduates are not only academically proficient but also professionally prepared to tackle real-world challenges.

One of the program's strengths lies in its integration of modern teaching and assessment methods. The use of innovative pedagogical approaches, such as case methods and collaborative projects, enhances the learning experience and encourages critical thinking. Additionally, the program's emphasis on internships and practical training, both within Ukraine and internationally, provides students with invaluable hands-on experience and exposure to diverse economic environments.

In light of the ongoing digital transformation of global economic processes, the program could further enhance its relevance by incorporating additional courses on emerging trends such as sustainable development, digital economies, and the role of artificial intelligence in international economics. Expanding the number of courses offered in English would also strengthen the program's appeal to international students and facilitate greater global integration for graduates.

Overall, the Master's program in "International Economics" holds significant potential for shaping highly skilled professionals capable of contributing to the economic development of Ukraine and the world. It offers a robust foundation in international economics, equipping students with the expertise and competencies needed to excel in a competitive global job market.

Dr. hab., professor of Institute of  
Management and Quality Sciences,  
Humanitas University, Poland
